

Occupational pension actuary

Understand, manage and optimise your occupational pension commitments.

You are:

- A pension institution, a collective pension foundation, a joint pension foundation, under private or public law
- A public institution
- A local or multinational company

Our services

Independent expert advice pursuant to Article 52 of the LPP

- Periodically ensuring that the pension institution guarantees that its commitments will be met
- Ensuring that actuarial regulatory provisions and those relating to benefits and financing comply with legal requirements
- Submitting recommendations with regard to technical bases
- Recommending measures that should be taken in the event of a deficit

Actuarial advice for pension institutions

- Getting a second opinion
- Developing an insurance plan and comparing it with those of companies in the same industry
- Examining the need for insurance and optimising insurance cover
- Studying liabilities in a forward-looking manner
- Providing support during a merger or a partial or total liquidation (appointment as liquidator)
- Developing a pension plan and comparing it with those of companies in the same sector

International accounting standards

- Evaluating a company's liabilities according to international accounting standards (IAS19, US GAAP ASC 715, IPSAS 39) using software recognised by leading auditing companies
- Establishing a clear and customised report
- Consolidating the commitments of multinationals with an assessment of foreign subsidiaries through our global network of advisers
- Determining the employer's necessary risk management measures (de-risking)
